

What's in the box?

- Younger children - I have 10p in the box – What could my 4 coins be?
- Middle years – I have 50p in the box – What could my 9 coins be?
- Older children – I have £1.00 in the box. What could my 15 coins be?

Things to try at home!

- Take some coins out and have a close look at them. What colour are they? What symbols do they have on them? How thick are they? Do they have markings on the rim?
- Close your eyes – feel for a coin. Can you guess what it is?
- Can you find two coins that have the same value but a different appearance?
- Can you put your coins in order of size? Can you order them in value? What do you notice?
- Make 10p, 50p with different coins. Can you make these values with just silver coins? Or just copper coins?
- Try some of our investigations overleaf
