

Year 2

Last week, Year Two went to the LookOut discovery centre in Hyde Park. We used our super scientist skills to explore different microhabitats and have written recounts which include all the plants and animals we discovered.

Next we went to the log rolling area. I observed some interesting animals such as a frog, a woodlouse and a slug.

On ~~went~~ Wednesday, year 2 went on a trip to Hyde Park because in science we have been learning about micro habitat and habitats. First we explored around the pond. I discovered a smooth newt, dragonfly nymph and a freshwater shrimp.

After that we went to the meadow. I spotted a spider, butterflies and crickets. Finally we went to the serpentine lake I saw a heron, swans and a ducks on the water.
